**Unit- I**

**Partial Differentiation:** Introduction - Functions of two variables - Neighborhood of a point (a, b) - Continuity of a Function of two variables, Continuity at a point - Limit of a Function of two variables - Partial Derivatives - Geometrical representation of a Function of two Variables - Homogeneous Functions.

**Unit- II**

Theorem on Total Differentials - Composite Functions - Differentiation of Composite Functions - Implicit Functions - Equality of  $f_{xy}(a, b)$  and  $f_{yz}(a, b)$  - Taylor's theorem for a function of two Variables - Maxima and Minima of functions of two variables – Lagrange's Method of undetermined multipliers.

**Unit- III**

**Vector Spaces:** Vector Spaces and Subspaces - Null Spaces, Column Spaces, and Linear Transformations -Linearly Independent Sets - Bases - Coordinate Systems -The Dimension of a Vector Space

**Unit- IV**

Rank - Change of Basis - Eigenvalues and Eigenvectors - The Characteristic Equation

**Unit- V**

Diagonalization - Eigenvectors and Linear Transformations -Complex Eigenvalues - Applications to Differential Equations.

**Suggested Reading**

1. Lay DC. Linear Algebra and its applications 5th edition. Pearson. 2016.
2. S Lang. Introduction to Linear Algebra. Spring New York; 2012.
3. Strang G. Linear algebra and its applications, Thomson Learning. Inc., London. 1988.
4. Shanti N, Mittal PK. Differential Calculus. S. Chand Publishing; 2005.
5. Shanti N, Mittal PK. Integral Calculus. S. Chand Publishing; 2005.

Course Code	Course Title	Category	L	P	Credits	SEE	CIE	SEE	CIE
<b>PCC302</b>	<b>Java Programming</b>	<b>PCC</b>	<b>4</b>	<b>-</b>	<b>4</b>	<b>70</b>	<b>30</b>	<b>3</b>	<b>1</b>

**Unit-I**

**Introduction to Java:** Java History – Features of java, how java differ from C and C++, Introduction to JDK and JRE, Java Primitive Types, Basic Operators, Conditional and Logical statements, Some Typical Differences Between C and Java.

**Defining Classes:** Adding Instance Fields and Methods, Constructors, Access Modifiers (Visibility Modes), Object Creation Examples, Method Overloading and Constructor Overloading, use of static and final keywords, Objects as parameters, Difference between local variable and instance field, Introduction to Object class, How to read user input (from keyboard).

**Unit-II**

**Arrays, Strings in Java:** How to create and define arrays, Introduction to java.util.Array class, Difference between String & StringBuffer classes, StringTokenizer class and Wrapper classes and conversion between Objects and primitives.

**Inheritance, Interfaces and Packages in Java:** Defining super / sub classes, Abstract classes, Method overriding, Interfaces, Using Library Interfaces, Comparable and Comparator, Creating and Defining packages.

**Inner classes in Java:** Types of inner classes, Creating static / non-static inner classes, Local and anonymous inner classes.

**Unit-III**

**Exception Handling in Java:** What are exceptions, writing your own exception classes, try, catch, throw, throws, finally clauses, Difference between checked vs unchecked Exceptions, Error vs Exception.

**Multithreading in Java:** Thread and its Life cycle, how to create threads, Thread class in java, use of synchronized keyword, how to avoid deadlock.

**Unit-IV**

**GUI Design & Event Handling:** Component, Container, Color, GUI Controls, Layout Managers, Introduction to Swings, Events, Listeners, Icon interface, Writing GUI Based applications, Applets, Running Applets.

**Unit-V**

**File Handling:** Stream classes, Reader and Writer classes, File and Directory class.

**Generics and Frameworks:** Generics, Collections Framework, Collection interfaces and classes ArrayList, LinkedList, Vector.

## **Suggested Reading**

1. Naughton P, Schildt H. The Complete Reference Java 2. McGraw-Hill Education, 1999.

BCA SEM III – THEORY			Hours /week			Scheme of Examination			
Course Code	Course Title	Category	L	P	Credits	SEE	CIE	SEE	CIE
MC303	Environmental Science	MC	4	-	4	70	30	3	1

**Unit I**

**Environmental Studies:** Definition, scope and importance, need for public awareness. **Natural resources:** Water resources; use and over-utilization of surface and ground water, floods, drought, conflicts over water, **dams:** benefits and problems. Effects of modern agriculture, fertilizer- pesticide problems, water logging and salinity.

**Unit II**

**Ecosystems:** Concept of an ecosystem, structure and function of an ecosystem, producers, consumers and decomposers, energy flow in ecosystem, food chains, ecological pyramids, aquatic ecosystem (ponds, streams, lakes, rivers, oceans, estuaries).

**Energy resources:** Growing energy needs, renewable and non-renewable energy sources, Land Resources, land as a resource, land degradation, soil erosion and desertification.

**Unit III**

**Biodiversity:** Genetic species and ecosystem diversity, bio-geographical classification of India, Value of biodiversity, threats to biodiversity, endangered and endemic species of India, conservation of biodiversity.

**Unit IV**

**Environmental Pollution:** Causes, effects and control measures of air pollution, water pollution, soil pollution, noise pollution, thermal pollution; solid and liquid waste management.

**Environment Protection Act:** Air, water, forest and wild life Acts, enforcement of environmental legislation.

**Unit V**

**Social Issues and the Environment:** Water conservation, watershed management, and environmental ethics, climate change, global warming, acid rain, ozone layer depletion.

**Environmental Disaster Management:** Types of disasters, impact of disasters on environment, infrastructure and development, Basic principles of disaster mitigation, disaster management and methodology, disaster management cycle and disaster management in India.

### **Suggested Readings**

1. De AK. Environmental Chemistry Wiley Eastern Ltd. New Dehli. 1987.
2. Odum EP, Barrett GW. Fundamentals of ecology. Philadelphia: Saunders; 1971.
3. Rao MN. Waste water treatment. Oxford and IBH Publishing; 2018.
4. Joseph B. Environmental studies. Tata McGraw-Hill Education; 2005.

BCA SEM III – THEORY		Hours /week	Scheme of Examination						
Course Code	Course Title		Category	L	P	Cre-dits	MaxMarks	Duration(hrs)	
<b>PCC304</b>	<b>Operating System Concepts</b>	<b>PCC</b>	<b>4</b>	<b>-</b>	<b>4</b>	<b>70</b>	<b>30</b>	<b>3</b>	<b>1</b>

**Unit I**

**Introduction:** Definition of Operating System, Computer System Organization, Computer System Architecture, **Operating Systems Structure:** Operating System Services, System Calls, Types of System Calls. **Process:** Process Concept, Process Scheduling, Operations on Processes, Inter process Communication, **Threads:** Overview, Multicore Programming, Multithreading Models, Threading Issues. **CPU Scheduling:** Basic Concepts, Scheduling Criteria, Scheduling Algorithms

**Unit II**

**Process Synchronization:** Background, The Critical-Section Problem, Peterson's Solution, Synchronization Hardware, Mutex Locks, Semaphores, Classic Problems of Synchronization, Monitors.

**Deadlocks:** System Model, Deadlock Characterization, Methods for Handling Deadlocks, Deadlock Prevention, Deadlock Avoidance, Deadlock Detection, Recovery from Deadlock.

**Unit III**

**Main Memory:** Background, Swapping, Contiguous Memory Allocation, Segmentation, Paging, Structure of the Page Table.

**Virtual Memory:** Background, Demand Paging, Page Replacement, Allocation of Frames, Thrashing, Memory-Mapped Files, Mass Storage Structure, Overview of Mass Storage Structure, Disk Structure, Disk Attachment, Disk Scheduling, Disk Formatting, RAID Structure

**Unit IV**

**File System Interface:** File Concept, Access Methods, Directory and Disk Structure, Protection. **File System Implementation:** File System Structure, File System Implementation, Directory Implementation, Allocation Methods, Free-Space Management, Efficiency and Performance.

**I/O Systems:** Overview, Application I/O Interface, Kernel I/O Subsystem, Transforming I/O Requests to Hardware Operations.

## **Unit V**

**Protection:** Goals of Protection, Principles of Protection, Domain of Protection Access Matrix, Implementation of the Access Matrix, Access Control, Revocation of Access Rights, Capability Based Systems.

**Security:** The Security Problem, Program Threats, System and Network Threats, Cryptography as a Security Tool, User Authentication.

### **Suggested Readings**

BCA SEM III – THEORY			Hours /week			Scheme of Examination			
Course Code	Course Title	Category	L	P	Credits	SEE	CIE	SEE	CIE
PCC305	Database Design	PCC	4	-	4	70	30	3	1

**Unit I**

**Database Environment:** concepts and definitions, traditional file processing systems, database approach, range of database applications, advantages, costs and risks, components, Database Development process, IS development, three schema Architecture, **Database Analysis:** E-R Model - Entities, attributes, Relationships, degree and cardinality - case studies.

**Unit II**

**Enhanced E-R model:** super type, sub type, specialization and generalization, constraints, disjointness, subtype discriminator, super type /subtype hierarchies, business rules, scope classification, structural constraints, operational constraints, case study. **Relational model:** Definitions, integrity constraints, transforming EER diagrams into relations, **Normalization:** normal forms, merging relations, case study.

**Unit III**

**Relational Algebra and Calculus:** Preliminaries, Relational Algebra, Relational Calculus, Expressive Power of Algebra and Calculus.  
**SQL:** Queries, Constraints, Triggers, The Form of Basic SQL Query, Set Operators, Nested Queries, Aggregate Operators, Procedures and functions, Triggers.

**Unit IV**

**Overview of Storage and Indexing:** File Organizations and Indexing, Index Data Structures, Comparison of File Organizations.  
**Tree-Structured Indexing:** Indexed Sequential Access Method (ISAM), B+ Trees, Search, Insert, Delete, B+ Trees in Practice.  
**Hash-Based Indexing:** Static Hashing, Extendible Hashing, Linear Hashing, Extendible versus Linear Hashing.

**Unit V**

**Transaction Management:** ACID Properties, Transactions and Schedules, Concurrent Execution of Transactions, Lock-Based Concurrency Control.  
**Concurrency Control:** 2PL, Serializability, and Recoverability, Introduction to Lock Management, Dealing with Deadlock.

**Suggested Readings**

**Unit I**

**Examples of Distributed Systems:** Trends in Distributed Systems – Focus on resource sharing – Challenges. **Case study:** World Wide Web, System Model – Inter process Communication – the API for internet protocols – External data representation and multicast communication.

**Unit II**

**Network virtualization:** Overlay networks, **Case study:** MPI, Remote Method Invocation and Objects, Remote Invocation – Introduction – Request-reply protocols – Remote procedure call – Remote method invocation.

**Case study:** Java RMI – Group communication – Publish-subscribe systems – Message queues – Shared memory approaches – Distributed objects, **Case study:** Enterprise Java Beans – from objects to components.

**Unit III**

**Introduction to Cloud Computing:** Cloud Computing in a Nutshell, System Models for Distributed and Cloud Computing, Roots of Cloud Computing, Grid and Cloud, Layers and Types of Clouds, Desired Features of a Cloud, Basic Principles of Cloud Computing, Challenges and Risks, Service Models.

**Unit IV**

**Virtual Machines and Virtualization of Clusters and Data Centers:** Levels of Virtualization, Virtualization Structures Tools and Mechanisms, Virtualization of CPU, Memory and I/O Devices, Virtual Clusters and Resource Management, Virtualization Data center Automation. **Case studies:** Xen Virtual machine monitors - Xen API, VMware - VMware products-VMware Features.

**Unit V**

**Cloud computing architectures over Virtualized Data Centers:** Data center design and Interconnection networks, Architectural Design of Compute and Storage Clouds, Public Cloud Platforms, GAE, AWS, Azure, Inter-cloud Resource Management.

**Unit I**

**Multiple Access:** Wired LAN, Ethernet IEEE 802.3 LAN, CSMA/CD protocol, Binary exponential backoff algorithm, Comparison of Switched, Fast and Gigabit Ethernet.  
**Wireless LAN:** IEEE 802.11 architecture. CSMA/CA protocol, Bridges and types of bridges, ARP and RARP.

**Unit II**

**Network Layer:** Logical Addressing, IPv4, Subnetting, and supernetting, CIDR, introduction to IPv6, ICMP, IGMP.  
**Routing:** Distance Vector Routing, Link State Routing, OSPF and BGP.

**Unit III**

**Transport Layer:** TCP State diagram, Window Management, Congestion Control, Timer Management and UDP protocol.

**Unit IV**

**Socket Programming:** Primitive and Advanced Systems Calls, TCP Iterative and Concurrent programs, UDP systems calls, socket options, I/O Multiplexing, Asynchronous I/O.

**Unit V**

**Application Layer:** Domain Name System, Simple Mail Transfer Protocol (SMTP), File Transfer Protocol (FTP), Hyper Text Transfer Protocol (HTTP).

**Unit I**

**Software Engineering:** Introduction, Program versus Software, Software Engineering, Software Development Process and its Stages, Generic Software Development Process Models, Code of Ethics and Professional Practice, Software Development and Maintenance Cost Breakup.

**Requirement Engineering Processes:** Requirement Engineering Process, Feasibility Study, Cost and Benefit Analysis.

**Unit II**

Requirement Specification, Characteristics of a Good Requirement and Validation Techniques, Requirements Management Planning, Process of Requirement Change Management.

**Software Requirement Specifications:** Introduction, Stakeholder Analysis, Software Requirements Document, IEEE Standard of Software Requirement Specifications, Organizing Functional Requirements, Traceability and Validation of Specifications.

**Unit III**

**Architectural Styles:** Introduction, Architecture Styles, Object Oriented Architecture, Inter-organizational Communication, Cloud Computing Architecture Style, Core, Configurable and Customizable Architecture, Design Models, Architectural Design Principles.

**Object Oriented System Analysis:** Introduction, Object Oriented Design, Object Oriented Design Models, Object Oriented Analysis, Data Modeling, Comparison Between Top Down Structured and Object Oriented Analysis, Description of Logical and Static Modeling, Identification of Class Relationships.

**Unit IV**

**Object Oriented Design Using UML:** Introduction, Sequence Diagram, State Machine Diagram, Timing Diagram, Describing Detailed Object Oriented Design, Decision Tree and Decision Table, Composite Structure Diagram, Generating Test Cases, Moving Towards Physical Design, Structured Methods.

**Software Development:** Introduction, Good Coding Practices, Code Reuse, Design Pattern, Generator Based Reuse, Application/Software Developed on Product Lines Approach, Component Based Software Engineering, Agile Methods.

**Unit V**

**Verification, Validation and Software Testing:** Introduction, Software Verification and Validation Process, Software Testing, System Testing, Object Oriented Testing Strategy, Test Cases, Equivalence Partitioning (Black Box Testing), Art of Debugging.

**Measurement and Metrics for Assessing Software Quality:** Introduction, ISO 9126 Quality Standards, Quality Management Models, Ways to Build Quality in Software, Software Quality Control and Metrics, Defect Density Metrics, Chidamber and Kemerer Metric Suites for Object Oriented System, Class Coupling Metric-Coupling Between Objects, Monitoring Dynamic Quality Attributes (Visible Externally) of a Software.

**Unit I**

**Introduction to data science:** Introduction to data science, Data Science Components, Data Science Process, Data Science Jobs Roles, Tools for Data Science, Difference between Data Science with BI (Business Intelligence), Applications of Data science, Challenges of Data science Technology.

**Data analysis:** Introduction to data analysis, Data Analysis Tools, Types of Data Analysis: Techniques and Methods, Data Analysis Process

**Introduction to Python:** Python features, Python Interpreter, modes of Python Interpreter, Values and Data types, Variables, Key words, Identifiers, Statements.

**Unit II**

Expressions, Input & Output, Comments, Lines & Indentation, Quotations, Tuple assignment, Operators, Precedence of operators.

**Functions:** Definition and use, Types of functions, Flow of execution, Parameters and Arguments, Modules.

**Conditionals:** Conditional(if), Alternative(if-else), Chained Conditionals(if-elif-else), Nested conditionals, **Iteration/Control statements:** while, for, break, continue, pass, fruitful function vs void function, Parameters/Arguments, Return values, Variables scope(local, global), Function composition.

**Unit III**

**Strings:** Strings, String slices, Immutability, String functions & Methods, String module, **List as array:** Array, Methods of array.

**Lists:** List operations, List slices, List methods, List loops, Mutability, aliasing, Cloning list, List parameters; **Tuple:** Benefit of Tuple, Operations on Tuple, Tuple methods, Tuple assignment, Tuple as return value, Tuple as argument; **Dictionaries:** Operations on Dictionary, methods in Dictionary, Difference between List, Tuple and Dictionary; **Advanced List processing:** List comprehension, Nested List.

## **Unit IV**

**Introduction to Numpy:** The basics of numpy array, computation on numpy arrays, aggregations, computations on arrays, comparisons, masks and Boolean logic, fancy indexing, sorting arrays, structured data.

## **Unit V**

**Data Manipulation with Pandas:** Introducing pandas objects, data indexing and selection, operating on data in pandas, handling missing data, hierarchical indexing, combining datasets, aggregation and grouping.

<b>LTC451</b>	<b>Data Science using Python Lab</b>	<b>LTC</b>	<b>-</b>	<b>4</b>	<b>2</b>	<b>50</b>	<b>25</b>	<b>3</b>	<b>2</b>

### Python

1. Write a program to demonstrate different numbers data types in python.
2. Write a python program to design simple calculator using functions.
3. Write a python program to check whether a given number is Armstrong number or not.
4. Write a python program to generate prime numbers between different intervals.
5. Write a python program to find factorial of a number using recursion.
6. Write a python program to check whether a string is palindrome or not.
7. Write a python program to count the number of characters present in a word.
8. Write a python program to create, append and remove lists.
9. Write a program to demonstrate working with tuples in python.
10. Write a program to demonstrate dictionaries in python.

### Numpy

11. Python program to demonstrate basic array characteristics
12. Python program to demonstrate array creation techniques
13. Python program to demonstrate indexing in numpy
14. Python program to demonstrate basic operations on single array
15. Python program to demonstrate unary operators in numpy

### Pandas

16. Python code to demonstrate Pandas DataFrame with two-dimensional list
17. Python code to demonstrate creating DataFrame from dictionary of array and lists
18. Python code to demonstrate creating a Pandas dataframe using list of tuples
19. Python code to demonstrate how to iterate over rows in Pandas Dataframe
20. Python code to demonstrate how to get column names in Pandas dataframe

BCA SEM IV – Laboratory			Hours /week			Scheme of Examination			
Course Code	Course Title	Category	L	P	Credits	SEE	CIE	SEE	CIE
<b>LCC452</b>	<b>Software Engineering Lab</b>	<b>LCC</b>	<b>-</b>	<b>4</b>	<b>2</b>	<b>50</b>	<b>25</b>	<b>3</b>	<b>2</b>

**Case Studies**

1. Banking System
2. Hotel management system
3. Inventory Control System
4. Library management system
5. Railway Reservation System

**Choose any two of above case studies and do the following exercises for that case studies**

1. Write the complete problem statement
2. Write the software requirements specification document
3. Draw the entity relationship diagram
4. Draw the data flow diagrams
5. Draw use case diagrams
6. Draw activity diagrams for all use cases
7. Draw sequence diagrams for all use cases
8. Draw collaboration diagram
9. Assign objects in sequence diagrams to classes and make class diagram.

**Note**

- To draw dataflow diagrams using Microsoft Visio Software, SmartDraw, etc...
- To draw UML diagrams using Rational Rose Software, StarUML, etc...

<b>LCC453</b>	<b>Computer Networks Lab</b>	<b>LCC</b>	<b>-</b>	<b>4</b>	<b>2</b>	<b>50</b>	<b>25</b>	<b>3</b>	<b>2</b>

### **Networking concepts demonstration**

1. Demonstrations of IP address and ports in computer system.
2. Explanation of settings in network connections
3. Testing of networking connectivity using ping, tracepath
4. Checking network statistics with netstat
5. Demonstration of static and dynamic IP address settings
6. Understanding ethernet cabling and switched networks
7. Comprehension of routers and firewalls
8. Significance of DNS

### **Network programming**

1. Implement IPC using a) Pipes b) FIFO
2. Implement file transfer using Message Queue form of IPC
3. Design TCP iterative Client and server application to reverse the given input sentence
4. Design TCP concurrent Client and server application to reverse the given input sentence
5. Design TCP client and server application to transfer file
6. Design UDP Client and server application to reverse the given input sentence
7. Design UDP Client and server application to reverse the given input sentence
8. Design UDP Client server to transfer a file

### **Suggested Reading**

1. Advance UNIX Programming, Richard Stevens, Second Edition Pearson Education, 2006.
